
Environmental policy

It is the policy of Westland Environmental Safety Ltd that our environmental policy is in compliance with ISO14001:2015 and that our operations are conducted within the demands of our ISO14001 environmental management system, all customer contractual obligations and the expectations of all stakeholders.

The implementation of this policy is important to maintain our integrity as an organisation whose defined scope of operation presents a low level of risk to the environment: “The provision of consultancy services is controlled by procedures for the management of asbestos including inspection, technical testing/analysis, air sampling and the four stage clearance process”.

It is the policy of Westland Environmental Safety Ltd to ensure:

This policy is appropriate to the purpose of our organisation and our defined context, including the nature, scale and environmental impacts of our activities, products and services;

This environmental policy is communicated to all members of staff and available to external parties to the company upon request;

We commit to the protection of the environment;

We commit to the prevention of pollution;

We commit to the effective management elements defined in our scope of operation;

We commit to the waste management of asbestos and compliance with the Control of Asbestos Regulations 2012;

We commit to continual improvement of the environmental management system to enhance environmental performance.

Environmental Objectives are discussed and set at management review meetings and action plans are formulated where required to monitor the progress towards achievement of the set objectives.

The ISO14001 system implemented by Westland Environmental Safety Ltd shall establish a review and audit system to evaluate the system’s processes & operations to determine its level of compliance and effectiveness. Management Reviews will be utilised to present findings to the company’s directors.
